

CodeRealm Corporation is a Presenting Company at AAMA Connect 2006

MOUNTAIN VIEW, California, September 20, 2006 - - CodeRealm Corporation's founder, chairman, and CEO Bill Gramas will present our company to the AAMA Connect 2006 Conference on Thursday, September 21, 2006, and Friday, September 22, 2006. AAMA (Asia America MultiTechnology Association) will hold its Connect 2006 Conference at the Santa Clara Hyatt & Convention Center in Santa Clara, California on September 21 and 22, 2006. The AAMA Connect 2006 Conference theme is Navigating China: Negotiating the Changing Business Landscape.

About AAMA

AAMA (Asia America MultiTechnology Association) is the most powerful network for technology executives conducting business across the Pacific Rim. AAMA is Silicon Valley's leading MultiTechnology business network promoting the success of the Asia America region's technology enterprises. Through its diverse programs ranging from monthly Speakers Series to the Asia-Silicon Valley Technology Investment Conference, AAMA provides a forum in which members can network, exchange ideas and share resources to promote and build one another's companies and careers, ultimately benefiting the larger Pacific Rim technology community. AAMA has an 8,000 strong network and represents more than 1,100 members from almost 800 companies. AAMA's URL is www.aamasv.com and the Connect 2006 URL is www.aamasv.com/connect2006/.

About CodeRealm Corporation

CodeRealm Corporation offers solutions that allow machine-generated information to operate automatically and autonomously in a distributed enterprise. We make this valuable information available on-demand, as a service, over the Internet, to the data owning enterprise. Why are we needed? Soon the Internet will have trillions of users it does not have today. Most of them will not be human beings. Machine-generated information operating automatically and autonomously is called invisible business. Our on-demand solutions are flexible, can be customized, and can adapt to our customer's needs. Our web site offers sample industry applications and demonstrations. Visit our web site at www.cdrlm.com for more information about our company. You may contact us directly at info@cdrlm.com to adapt our solutions to your needs.
